

RARE DISEASE DAY
EryDel is spreading the voice!

Rare Disease Day is marked globally every year on the last day of February, this year on 29th - the rarest date on the calendar to underscore the nature of rare diseases and what patients face. Raising public awareness truly makes a difference. It gives families hope and can lead to new, life-saving treatments. Everyone has his/her own stripes, those characteristics that make each individual distinct. Join us to wear stripes on Rare Disease Day to raise awareness and show support for those living with rare diseases. Thank you!
